

# RETRO

**AHFI:** Rich, structural appearance full of natural character, sound and black knots possible, knotholes are professionally filled, resin pockets possible. Worm holes, shakes, nail holes, mechanical damages and contrasting colour variations are a valued feature. Shakes are not filled. Lamellas are joint free placed, but not joint free glued. Available with sanded or brushed surface.

**Bottom layer C+:** Spruce steamed, no special quality specifications. Filled surface.

The above picture shows an example of the natural character of the wood, this will vary in every panel. Variations in colour and grain patterns are natural and inevitable. A picture is never a substitute for the "real thing". For this reason we recommend a visit to your nearest Admonter dealer. He will be pleased to show you samples.

STIA Norm	Thickness mm app.	Length mm (Width 2030)	Top layer thickness mm	Top layer width mm	Middle layer	Packaging pack./palett
AHFI/CG+	19	5000	5	ab 200	SML/BML Spruce (subject to availability)	30

**SWP/3 non structural (ns):** Solid wood panels for non-structural use in wet areas.

**Legend:** SML = strip core, BML = board middle layer.
