

STONE PINE AGED

ZIA: Mostly sound knots, small black knots possible, knotholes and shakes are professionally filled; occasional shakes possible, sapwood possible, occasional resin pockets and pith ray possible, contrasting colour variations possible, the ageing process affects the entire depth of wear layer, warm brown colour similar to reclaimed wood, jointfree gluing.

Bottom layer C+: Stone pine AGED, no special quality specifications, closed surface.

The above picture shows an example of the natural character of the wood, this will vary in every panel. Variations in colour and grain patterns are natural and inevitable. A picture is never a substitute for the "real thing". For this reason we recommend a visit to your nearest Admonter dealer. He will be pleased to show you samples.

STIA Norm	Thickness mm app.	Length mm (Width 2030)	Top layer thickness mm	Top layer width mm	Middle layer	Packaging pack./palett
ZIA/C+	19	2100-4500 (subject to availability)	3,4	Mix	SML Spruce	30
ZIA/ZIA	40	2100/2500	3,4	Mix	Spruce 5-layer	10

SWP/3 non structural (ns): Solid wood panels for non-structural use in wet areas.

Legend: SML = strip core, BML = board middle layer.
