

# Galleria RECLAIMED WOOD EXTREME

Surface full of character, sound and black knots possible, resin pockets, shakes, nail holes, mechanical damages and bark pockets possible. Colour variations and worm holes are a valued feature. Lamellas are jointfree placed but not jointless glued. Longitudinal and transverse joints of top layers possible.

**Surface:** brushed – holes are mainly filled.

**Bottom layer:** softwood, without special quality specification.

The above picture shows an example of the natural character of the wood, this will vary from element to element. Variations in colour and grain patterns are natural and inevitable. A picture is never a substitute for the "real thing". For this reason we recommend a visit to your nearest Admonter dealer. He will be pleased to show you samples.
