

# LARCH Vera

Top layer  
approx. 3,6 mm

FLOORs

### Admonter FLOORs on underfloor heating systems

Admonter FLOORs are ideally suited for underfloor heating systems. We suggest that our products ideally are fully glued down for best results with Admonter elastic adhesive. However, like all engineered boards our planks can be laid as a floating installation (except 2-layer floors and 3-layer floors small, they have to be fully glued down). We recommend hot-water underfloor heating systems set at low temperature. Please find detailed information in the information sheet *Admonter FLOORs on underfloor heating systems!*

### Admonter accessories

The wide range of accessories matches the Admonter FLOORs and includes flush-mount skirting and solutions for staircases.

### Regular care and maintenance

Please see the Admonter maintenance & installation instructions GB 2017.

### Further information
